Hyperparameter Tuning

grid search   Random Search.

Grid Search → parameter grid → all → evaluate → best. → global mln'n

Random →   "   → random → evaluate → best ⎫
                                  ↓   ⎬
                             time/resource   local minima

First do a random search CV and then do the grid search CV over that.

Bayesian Optimisation
